THE URBAN FUTURES MONTHLY

Stay up to date with the latest news from the Urban Futures Platform

Dear Colleagues and Friends,

I am happy to update you on the following pieces of news on the Platform's activities before we take a short winter break.

- The next [Brown Bag Lunch](#) will be on 11. December 2024. Petr Kodenko Kubala is going to present his work on Affordable Housing within "planetary boundaries". Don't miss out and register now!
- If you missed out on the last [Hot Off The Press](#) event, you can catch up on the book "Nature-Based Solutions for Cities" by Nadja Kabisch, Niki Frantzeskaki and Timon McPhearson, which is available open access on [Elgar Online](#).
- Urban Futures Research Affiliate Ruggero Cefalo and Principal Investigator Yuri Kazepov published an article in the [International Journal of Comparative Sociology](#) investigating school-to-work transitions in Italy and Austria.

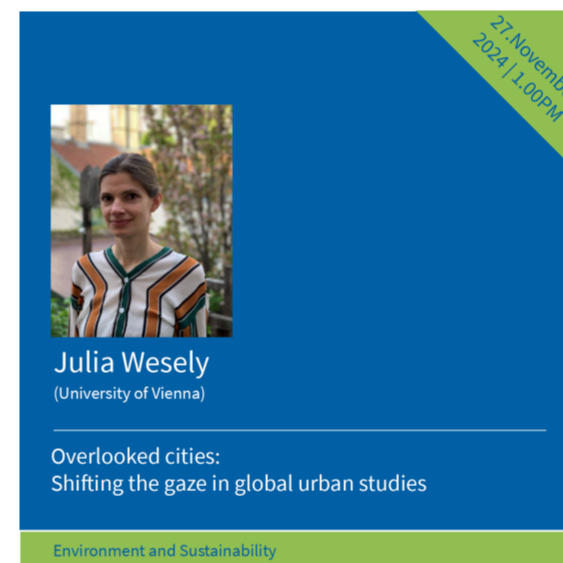

I hope to see you next year when we have more interesting events. Until then, I wish everyone a restful time between the years!

Kind regards,
Yuri Kazepov

Previous Brown Bag Lunch

Overlooked cities: Shifting the gaze in global urban studies

Julia Wesely is a Postdoctoral Fellow in the Urban Studies Research Group at the Department of Geography. Her research and teaching focuses on the intersections of environmental (in-)justice, learning and knowledge (co-) production in and across the urban global South and North. This talk examines debates on these cities through the notion of overlooked cities to understand how knowledge from such cities is produced and circulated in urban research and practice. Based on her work with the Overlooked Cities Collective, Julia illustrates how different people, places, and practices remain intentionally or unintentionally marginalised, off-the-map and under-theorised in global urban studies, and with what consequences.

Previous Hot Off The Press

Nature-Based Solutions for Cities

Nadja Kabisch and Niki Frantzeskaki will be presenting their new book "Nature-Based Solutions for Cities".

Nature-based solutions (NBS) are increasingly being adopted to address climate change, health, and urban sustainability, yet ensuring they are effective and inclusive remains a challenge. Addressing these challenges through chapters by leading experts in both global south and north contexts, this forward-looking book advances the science of NBS in cities and discusses the frontiers for next-generation urban NBS.

Discussants: Kerstin Krellenberg (University of Vienna) and Carmen Pérez
