

CONSENT FORM

By clicking the "Yes" button, I confirm my voluntary participation in the WELLCOH research project. I understand that my involvement consists of completing a questionnaire and that I had the opportunity to receive detailed information about the study beforehand. I was given sufficient time to consider my participation, ask questions, and review the "Privacy Notice" and "Information for Participants" documents.

I am fully aware that my participation is voluntary, without any financial compensation, and that I am under no obligation to take part. I understand that my contact data (email or phone number) may be stored securely by Triconsult GmbH for a maximum of six months, solely for communication-related purposes and in accordance with current data protection regulations. This information will be accessible only to authorized personnel.

I understand that my responses will not be audio recorded or transcribed. I understand that the questionnaire does not contain any questions related to personal data and I will not be identifiable in any way based on this data set. I consent to my answers being stored as part of an anonymised dataset within the secure institutional digital environment of the Challenge of Urban Futures Research Platform at the University of Vienna. These data will be retained until September 2037 and will be analysed by the WELLCOH research team using quantitative methods.

I can stop completing the questionnaire at any point, without providing any explanation or facing any negative consequences. Beyond withdrawing from participation in the survey, I have the right to request that all of my data be deleted within ten days by contacting the designated study representatives: Dr. Ádám Németh (email: adam.nemeth@univie.ac.at) or Prof. Yuri Kazepov (email: yuri.kazepov@univie.ac.at).

I give my consent to each of these aspects. I agree to participate in the WELLCOH interview.
